

A young woman with long dark hair, wearing a black jacket and pants, is sitting cross-legged on a wooden picnic table. She is smiling at the camera. The setting is a field of tall, dry, golden-brown grass. In the background, there are large, rugged mountains with some snow on their peaks. The sky is overcast and grey. Bare tree branches are visible in the foreground and to the right.

Hi! I'm Nikki and I'm a 4<sup>th</sup> year student at UC San Diego. I recently studied abroad in Scotland and I really enjoy taking photos, so I figured I would introduce myself with photos I took while abroad!

ISLE OF SKYE, SCOTLAND

In my free time I love watching movies and TV shows like *1917* and *The Crown*. I'm reading *The Eye of the World* and play *Mario Tennis* and *Tetris 99* daily on the Nintendo Switch. I also love to stay active and hang out with friends through tennis, running, or bowling.

COPENHAGEN, DENMARK

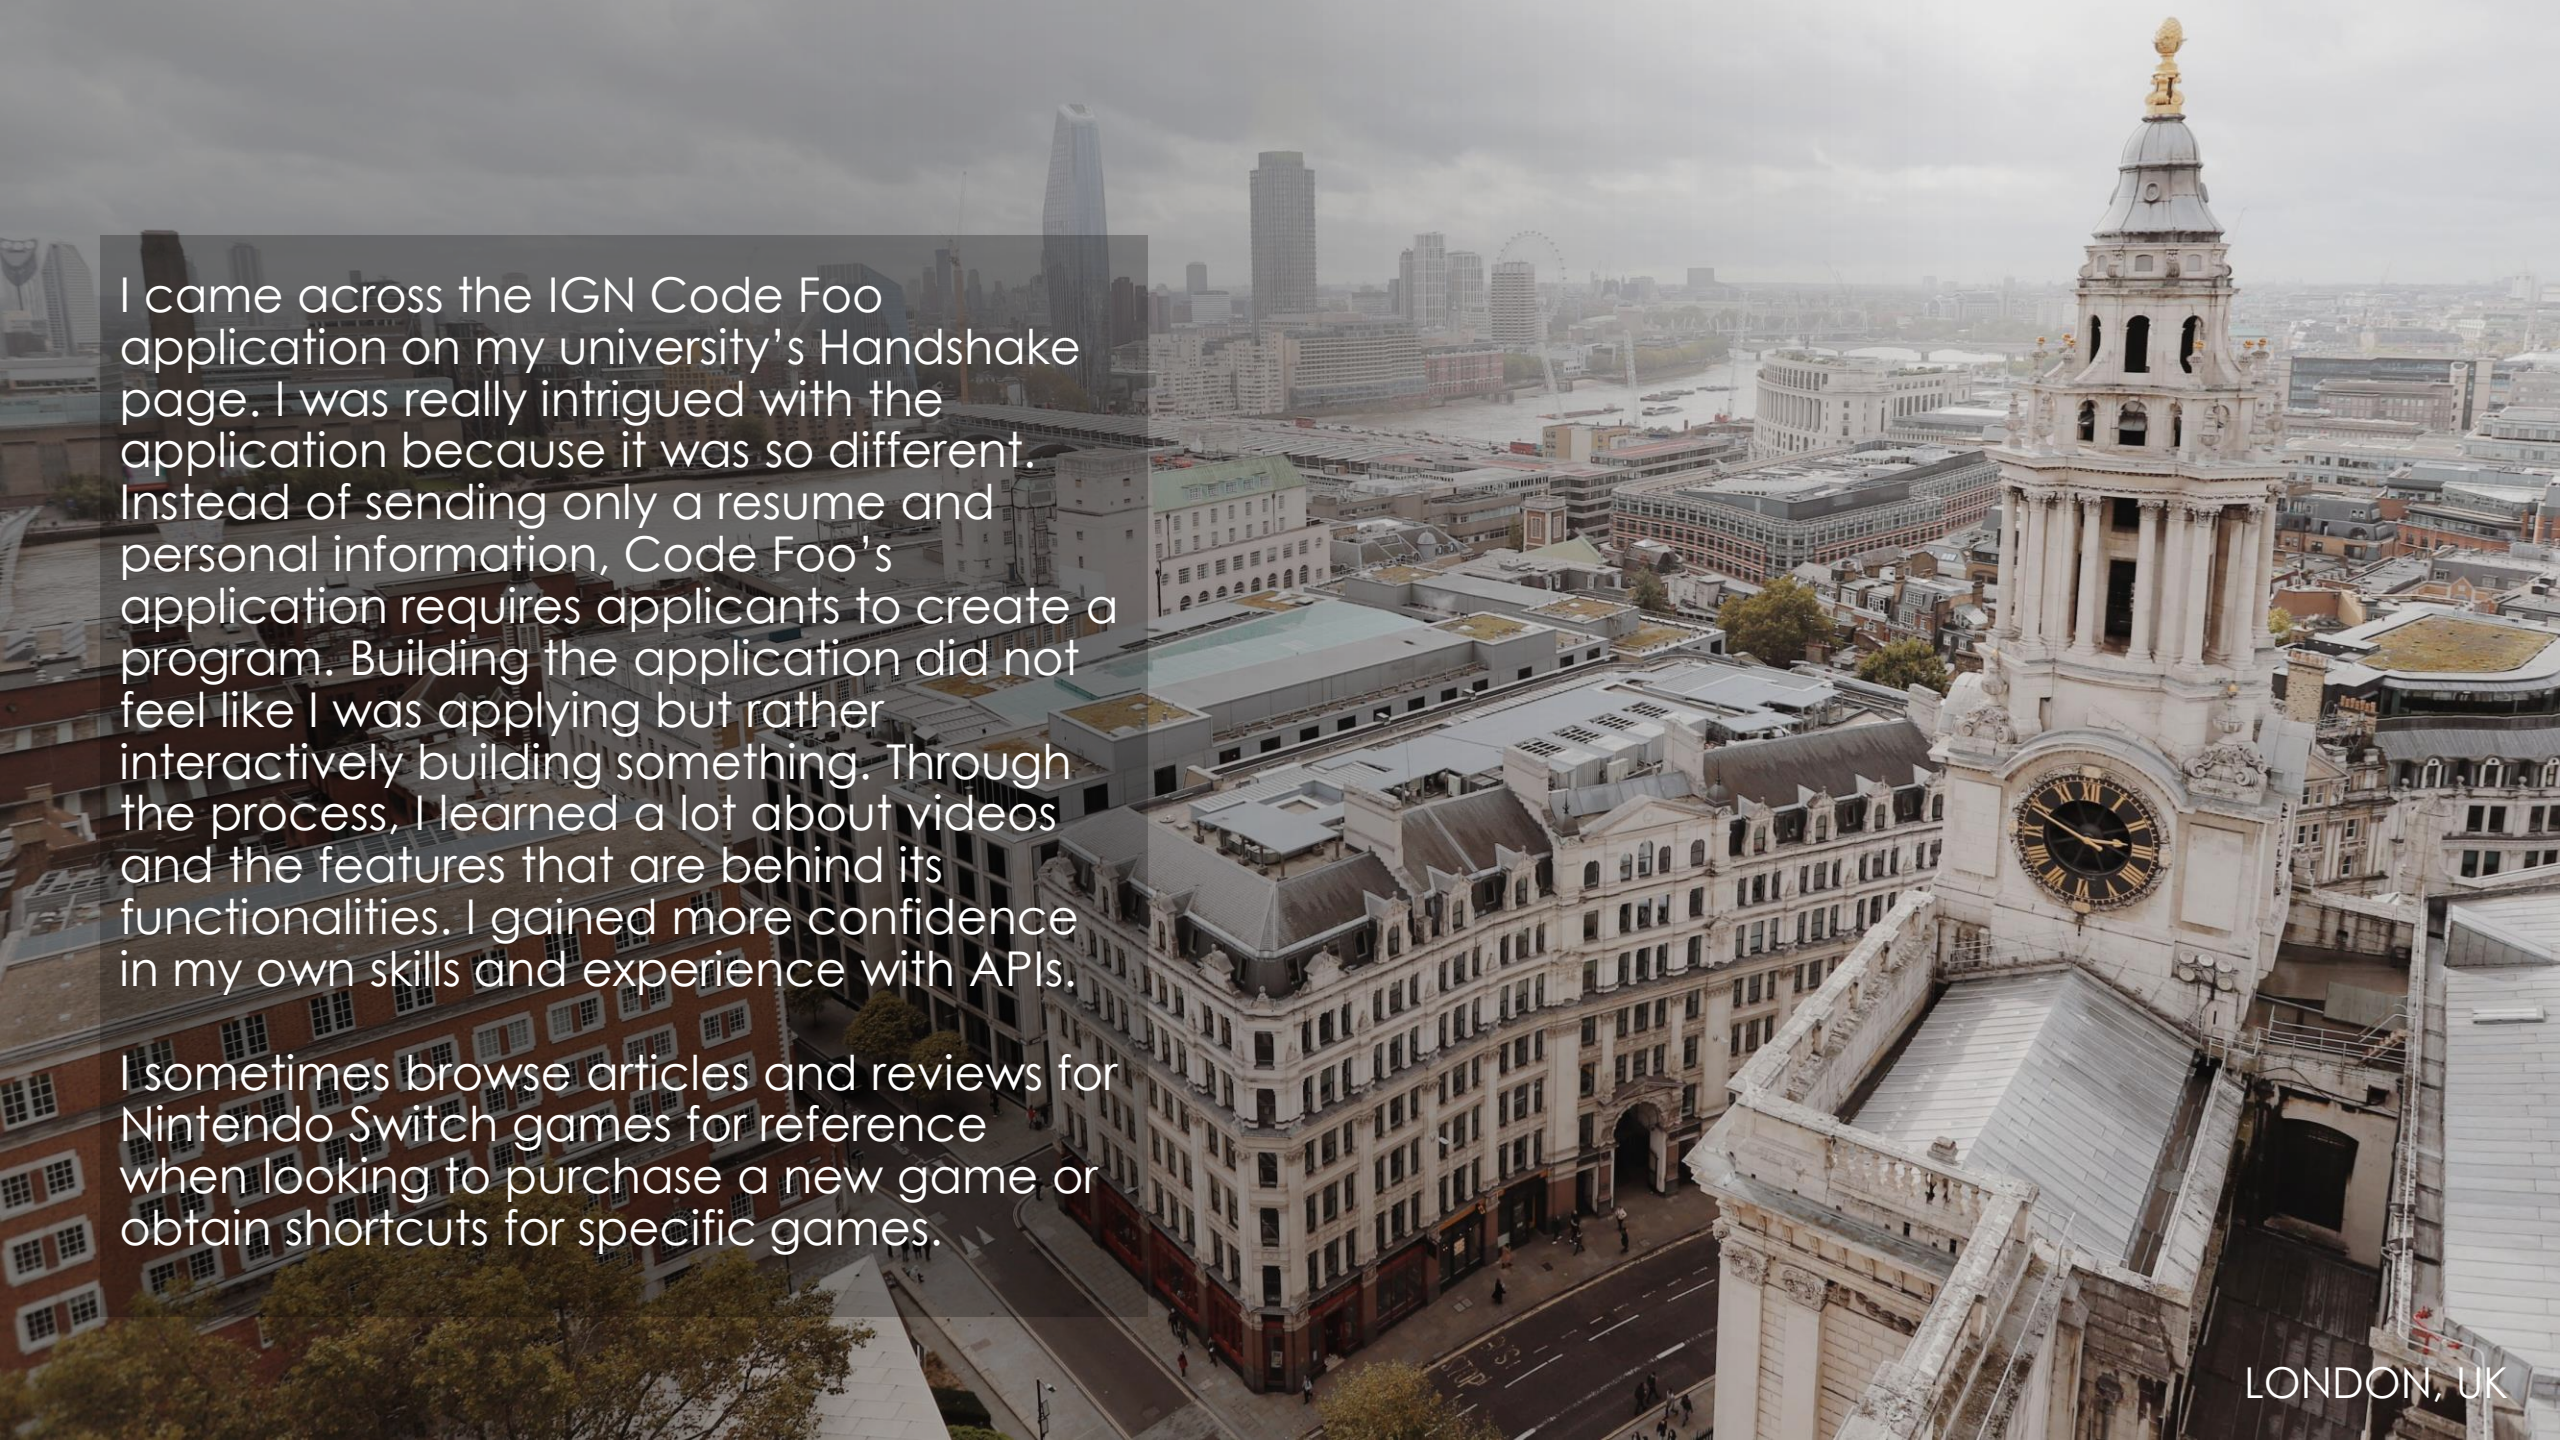

I'm really interested in web development and data analytics. I know I do not have extensive professional experience regarding the two fields but I'm curious and eager to continue to expand my knowledge and skillset through this internship.

PRAGUE, CZECH REPUBLIC

An aerial photograph of London, UK, featuring St. Paul's Cathedral in the foreground on the right. The cathedral's large clock face and ornate dome are prominent. The surrounding cityscape includes various buildings, streets, and the River Thames in the distance. The sky is overcast.

I came across the IGN Code Foo application on my university's Handshake page. I was really intrigued with the application because it was so different. Instead of sending only a resume and personal information, Code Foo's application requires applicants to create a program. Building the application did not feel like I was applying but rather interactively building something. Through the process, I learned a lot about videos and the features that are behind its functionalities. I gained more confidence in my own skills and experience with APIs.

I sometimes browse articles and reviews for Nintendo Switch games for reference when looking to purchase a new game or obtain shortcuts for specific games.

IGN should pick me to participate in the Code Foo program because I believe I would contribute a lot to IGN and the program. I really believe that Code Foo provides an invaluable and memorable experience and it would be amazing to be able to be a part of it. I haven't had the most internship experience but I am eager to learn new things and dive into new projects.

I am a motivated and driven person who finishes projects to completion who also wants to really learn and loves being busy and productive.

I love playing games and I believe being a part of IGN would be so interesting in learning about this industry.

CLIFFS OF MOHER, IRELAND

Thank you for taking the time to  
review and read my application.  
I look forward to speaking to you!

ROME, ITALY
